DETAILED ACTION

Applicant's election of Claims 2 and 3 in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the reasons for traversal, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant's suggested grouping of claims has been considered. However, see that Group II as suggested is directed to different species as pointed out in the previous action. See that claims 7 and 9 are not shown in the Figures mentioned in the response, but in figure 10 (radiator and fin).

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: reference number 9. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter that the applicant regards as his invention.

Claims 2 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites "the same"". This phrase lacks antecedent basis.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bertin et al. (US 6222276).

Bertin et al. discloses (See Figures 20 and 21):

A semiconductor device comprising a substrate 140 (Col. 7, lines 15+) having one principal plane; a first semiconductor chip 50 including bups 40A and active regions formed on the same side as said bumps, said bumps serving as electrodes attached to said one principal plane of the substrate; and a first chip capacitor 136 attached to the opposite side of the active region of first chip, said first chip capacitor serving to reduce power source noise.

Bertin et al. also discloses:

The first chip including through type via contacts 30 extending from said active regions to said opposite side in said first semiconductor chip, and the chip capacitor being connected to said active regions through said vias.

However, Bertin et al. does not specifically disclose a BGA connected to 140. See that BGA are a widely known/used connection means among semiconductor artisans for the purpose of providing an inexpensive connection mean that is space saving. Therefore, it would have been obvious to form a BGA

on the surface of the structure as disclosed by Bertin et al. in order to provide inexpensive and compacted connection means.

expensive and compacted connection means.

Any inquiry concerning this communication or earlier communications from

the examiner should be directed to Lourdes C. Cruz whose telephone number is

703-306-5691. The examiner can normally be reached on M-F 10:00- 6:30.

If attempts to reach the examiner by telephone are unsuccessful, the

examiner's supervisor, David L. Talbott can be reached on 703-305-9883. The

fax phone numbers for the organization where this application or proceeding is

assigned are 703-308-7722 for regular communications and 703-308-7722 for

After Final communications.

Any inquiry of a general nature or relating to the status of this application

or proceeding should be directed to the receptionist whose telephone number is

703-308-0956.
